

EFINOR

# Global services to the Nuclear industry

As a global enterprising company since 1988, EFINOR Group has invested in improving both its design and manufacturing capabilities. This investment has put EFINOR at the forefront of the Nuclear industry.

Specialising in multi-discipline, high value and global development projects, we collaborate with our clients to provide complete solutions for their full industrial product cycles. We are able to provide global services including design, calculations, manufacturing, site erection, commissioning and maintenance.

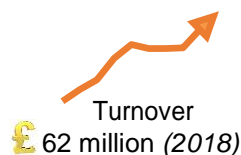

EFINOR are able to integrate systems as a Tier 1 supplier, working closely with main EPC contractors such as Framatome, Orano, EDF, NNB, GE, Bouygues TP, Bylor...

23 locations

800+ employees

Turnover

£62 million (2018)

→ **ENGINEERING**

→ **MANUFACTURING**

→ **SUPPORT**

EFINOR developed skills and know-how through large international Nuclear New Build projects:

EPR Hinkley Point

C EPR Taïshan

EPR Flamanville 3

ITER

Our Group is renowned for **systems integration** on large Nuclear projects. Through our strong experience, **we are able to provide solutions to our clients from engineering design and studies, to manufacturing, on-site erection and maintenance.**

As part of our long-term engagement with our customers and the recognition of the high standard of our work, we have been able to turn a prototype into a world-wide recognised product: the pool-liner of IRWST pools (safety pools located in the nuclear island of EPR reactors).

We are also able to provide **maintenance services** through bespoke solutions responding to our clients' requirements. We developed a multi-element mechanical plug for the Nuclear market under EDF patent: **OBTPLUS®**. We industrialised the prototype and manufactured **20 units** to allow **water pressure tests on Nuclear Power Plants**, demonstrating both our ability to work collaboratively and to innovate.

**EFINOR production qualities, certifications and our Nuclear Safety Culture are recognised by our clients throughout the Nuclear industry.**

THINKING MATTER WORKING MATTER SUSTAINING MATTER TRANSFORMING MATTER EFINOR

EFINOR owns the exclusive operating licence of the OBTPLUS® patent

# Global services to the Nuclear industry

## Certifications and norms expertise

- ISO 9001 - 2015
- ISO 14001
- ISO 45001
- CEFRI
- QUALIFOUDRE
- Classified Contracts
- RCC-M, RCC-E, ASME

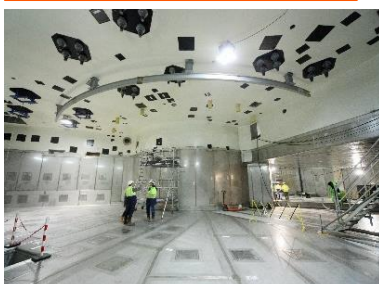

## Clients' qualifications

- EDF Energy – NNB
- G.E.
- EDF | UTO
- Orano | CAEAR
- FRAMATOME | QN100
- BYLOR
- NAVAL GROUP

Nuclear Casks

Pool Liners

Handling tool for Steam-generator

Main Control Rooms

Auto-Guided Vehicles

Nuclear Plugs
